

JEBIN ABRAHAM SAMUEL RAJ

Thoothukudi | +91-7708089768 | jebinabraham1804@gmail.com

SUMMARY

A results-driven Generative AI Engineer with a strong foundation across modern AI tools, machine learning, deep learning, and NLP, specializing in end-to-end development of intelligent systems. Demonstrated expertise in fine-tuning open-source models for domain-specific applications, significantly improving performance and real-world relevance. Equally proficient in Frontend development, with mastery of core UI/UX principles to design creative, scalable, and professional interfaces. Experienced in building interactive AI-powered applications using LangChain for orchestration and Streamlit for rapid deployment, with a strong drive to deliver impactful solutions across education, public services, and entertainment.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, SQL, C++, HTML/CSS
- **AI & ML :** Machine Learning, Deep Learning, Vision-Language Models, Large-Language Models, Retrieval-Augmented Generation, Generative AI, Agentic AI, Computer Vision, Edge AI, Parameter-Efficient Fine-Tuning, Semantic Search, Cognitive Architectures, Reasoning & Planning , Memory Systems, Conversational AI
- **Tools, Frameworks & Techniques:** PyTorch, TensorFlow, Keras, HuggingFace, LangGraph, CrewAI, Microsoft AutoGen, Pydantic AI, Pinecone, ChromaDB, Weaviate, LangChain, LoRA, OpenCV, LlamaIndex, YOLO, UiPath, Neo4j, React, Vue.js, Angular.js, Next.js, Figma, Speech-to-Text, Text-to-Speech, LiveKit
- **MLOps & Cloud:** AWS, Azure, Google Cloud Platform (GCP), Docker, MLFlow, Model Evaluation, Safety Guardrails, Human-in-the-Loop Mechanisms
- **Frontend Development & UI/UX:** Responsive Design, Cross-Browser Compatibility, UI/UX Design, User-Centric Workflows, Prototyping, Interface Architecture

PROJECT

Tamil Story Generator

Mar 2025 - Apr 2025

- Designed a GenAI-based application that generates creative Tamil stories and advertisement content.
- Integrated a fine-tuned language model with Tamil TTS for voice output, creating a seamless experience for content generation and narration.

Tamil Nadu Citizen Services Chatbot

Feb 2025

- Built a smart chatbot that responds to questions about Tamil Nadu government schemes and services in both Tamil and English. reliable answers across multiple departments using a fine-tuned Tamil LLM.

AIML Department Website Development

Jun 2025 - Aug 2025

- Designed and developed a responsive, interactive website for the AIML department using HTML, CSS, JavaScript, and React. Focused on clean UI/UX design, mobile compatibility, and modern web standards. Collaborated with faculty and students to gather content and showcase academic events, research, and student achievements.

R&D Paper Evaluation System

Sep 2025 - Oct 2025

- Developed an Agentic AI-based R&D paper evaluation system that autonomously analyzes research papers for quality, relevance, and novelty using multi-agent reasoning.
- Automated scoring, feedback generation, and decision support, significantly reducing manual review time while improving evaluation consistency.

Reflexlabs Official Website

Dec 2025 - Feb 2026

- Developed the official Reflex Labs company website, delivering a responsive, high-performance interface aligned with brand identity and modern UI/UX standards.

EXPERIENCE

Postulate Info Tech Pvt Ltd | *Generative AI, (Intern)*

Jun 2024 - Jul 2024

- Fine-tuned pre-trained language models for domain-specific applications, improving performance metrics.
- Developed generative AI solutions for chatbots, content creation, and synthetic data, leading to increased user engagement and streamlined content generation processes

Karunya Hacks - Karunya Institute of Technology & Sciences | *Generative AI Engineer*

Dec 2024 - Present

- Developed innovative Generative AI solutions using Python during hackathons, showcasing effective use of deep learning frameworks.

Karunya Innovation & Design Studio | *Front-End Developer, (Intern)*

Jun 2025 - Aug 2025

- Built a responsive website for the AIML department using React, HTML, CSS, and JavaScript. Ensured mobile-friendly UI/UX and collaborated with faculty to present academic content effectively.

Reflexlabs.ai | *Front-End Developer*

Oct 2025 - Present

- Frontend Developer at Reflex Labs, delivering scalable and visually polished web interfaces aligned with modern UI/UX standards.

EDUCATION

Karunya Institute of Technology & Sciences

Aug 2023 - Present

B.Tech, Computer Science and Engineering (CSE) - Specialization in Artificial Intelligence (GPA: 7.77)

Coimbatore

- **Achievements:** 2nd prize Startup TN Thamizhi Hackathon

LANGUAGES

- English (Professional)
- Tamil (Native)
